

Features

Wide range of barcode symbologies

Wide range of output file types

Generate linear and 2D barcodes

User friendly

Check digit calculator

About Axicon

Axicon Auto ID is a world leader in barcode verification, having developed and manufactured our own range of verifiers since 1989. Axicon barcode verifiers are used to measure the quality of linear and matrix barcodes, on all levels of product packaging.

Filobar Graphics

Barcode software package

Filobar Graphics is a barcode file generation software package for users who need to create their own barcodes. The software enables you to choose from a wide range of linear barcode symbols, and some 2D symbols, and you can adjust their size, apply bar width adjustments in 1 micron increments, and when allowable, adjust the wide-to-narrow bar width ratio.

The software will also calculate the relevant check digit for GS1 barcodes, and check that your barcodes conform to the correct specifications. As well as being able to produce all the widely used GS1 barcodes, the software can also create Codabar, Code 39, Code 49, Maxicode, PDF-417, Micro PDF, Postnet, and other symbols.

The output files can be in a number of formats including EPS, Adobe Illustrator, Windows Metafile, Bitmap, or TIFF, and are compatible with desktop publishing graphic design and word processor software packages such as Adobe InDesign, Adobe FrameMaker, Corel Ventura, QuarkXpress, and Word.

Please note that this is specialist software for producing an image of a barcode for use within an existing design. It is not general label design software for label printer use.
