

Axicon Servicing of 1D/2D Verifiers

axicon

THE BARCODE EXPERTS

Axicon Verifier Servicing Options

Barcode Verifiers are high-precision pieces of opto-electronic testing equipment.

In order for them to deliver consistently accurate results they need to be tested regularly and then cleaned/ adjusted and recalibrated if necessary.

Axicon offer a range of options to meet the requirements of it's diverse range of customers with their differing needs.

These can essentially be categorised as follows:-

- a) VCAS - Verifier calibration and alignment service -This is performed on request as a one-off, as required service of a verifier. To keep a verifier in top condition we would normally recommend that this is done annually.
- b) Enhanced VCAS - Verifier clean, adjust and service (complete with a loan verifier whilst the customer's verifier is being serviced)
- c) Service Contract - For those customers who prefer to avoid having a fixed known annual cost - or for whom raising a purchase order for a repair at short notice may be difficult - we offer an annual fixed-cost service contract.
- d) Enhanced Service Contract - Gives all of the benefits of a service contract but also includes the availability of a loan verifier whilst the (included) VCAS is taking place.
- e) On-Site services - Axicon can also offer a range of VCAS/Service options at customer's site (UK only) - Please contact us for further details
- f) "As required" repair service - designed for those customers who prefer to have repairs undertaken on an "as required" basis with time and materials chargeable.

Accuracy, Repeatability and Reliability. Axicon has been involved with barcode verification for 30 years and pioneered the use of CCD imaging for verification. With time comes experience and insight and we're not short of either! Actively listening to our clients suggestions, we constantly enhance and improve our system. The result? The most comprehensive and flexible verification system on the market.

Benefits

- Maintain the precision accuracy of a brand-new verifier.
- Range of options to suit customer requirements.
- Covers all Axicon verifiers.
- Uses certified reference test cards.
- Conformance Certificates issued.

THE BARCODE EXPERTS

Axicon Verifier Servicing Options

1D/2D Verifiers***

Ensuring that a verifier is performing to the same level of precision accuracy as the day it was "born".....

Axicon's verifiers have been designed with both precision and robustness in mind.

Whilst our verifiers are made to very exacting standards we do recognise that our customers will often need them to be used in a production environment where rough handling will frequently occur... and in such environments the verifier should be checked at more frequent intervals to ensure that it is still working to the required standards of accuracy.

Axicon offer a range of servicing options that can be tailored to suit our diverse range of customers with their differing needs.

These can basically be summarised as follows:-

	VCAS (Verifier calibration and alignment service)	Enhanced VCAS	Service Contract	Enhanced Service Contract	On-Site Options (UK only)	Repair (Time and Material Basis)
Frequency	As required - Recommended Annually	As required - Recommended Annually	Annual	Annual	For VCAS or Contract	As Required
Repair	No	No	Included*	Included*	No	As required
Loan unit for duration	Not Included	Yes	Repair Only	Both Repair and VCAS	As required	No
VCAS			One Per Year	One per year	As Required	
Replacement Calibration Card	Included	Included	Included	Included	Included	Not Included
Updated Software Disc	Included	Included	Included	Included	Included	Not Included
Cost per verifier** (As at Jan 2015)	£ 475.-- (£595.--) + Shipping costs +vat	£ 570.-- + (£715.--) Shipping costs +vat	£ 680.-- (£850.--) p.a. + shipping Cost + vat	£ 775.-- (£970.--) p.a. + shipping Cost + vat	Please contact us as this is tailored to specific requirements	£95.-- (£125.--) + vat & shipping for quote which will be waived if repair is undertaken

* Service contract covers repairs except where this has been caused by mis-use of the equipment - in which case the labour cost is covered but parts are chargeable extra.

** Costs: Please note that a combi-set counts as two verifiers.

***1D/2D Verifiers means any of Axicon's 12000 and 15000 ranges
